Using Stern Maths Resources

My work is predominantly with the children in the lowest Maths set of each year group, some of which have individual help from me as well. However, I want the Stern to become a whole class resource too. !!

I have been using the first set of Stern equipment with my individual pupils as well as groups in Year 2 and 3. Teaching the tables has then followed on brilliantly with the tables cards that I write out for them and I use these up to Year 6!!!!

Teaching time with the Charlotte Clock again, is used effectively with Years 2 to 6. It seems to really help their comprehension of time. I wouldn't be without any of it!!!!
